Monaco Yacht Show 2017 - Tankoa and Exclusiva Design give life to Progetto Bolide

SEPTEMBER 29 2017

Written by Yachting Art Magazine

In addition to the world premier of the 50 meter S501 Vertige on display at QE06, the Italian shipyard has also presented many other novelties: from the birth of the PROGETTO BOLIDE

Exclusiva Design is one of the most important Italian design studios, with vast experience both in design and in the realization of private and public architectural projects.

The company has completed projects including the main offices for Gazprom in Saint Petersburg, airport passenger terminals, offices and public buildings, and residential projects on private islands in Doha, villas and apartments all across the Middle and Far East, Moscow, Saint Petersburg, Siberia, Paris, the Côte d'Azur, London and in the Alps.

Exclusive Design, with their vast experience in complex and challenging projects for demanding and confidential clients, is especially interested in the super-yacht world. Architect and designer Fabio Mazzeo together with manager Tito Taddei, founding members of the Studio, have carefully studied the sector to identify the shipyard that is projectually closest to their quality and building construction philosophy.

This is why they have chosen Tankoa Yachts as their partner for the PROGETTO BOLIDE, a 72 meter super-yacht, radical both in design and in its interpretation of luxury. Interiors and exteriors here represent something absolutely innovative on the international scene and are the direct result of Exclusiva's experience and know-how.
