## Tankoa Yachts Announce Two New Superyacht Projects

The Italian shipyard Tankoa Yachts may be a new company but they have hit the ground running. Coming on the heels their first yacht, Suerte, unveiled at this year's Monaco Yacht Show, The yacht builder has announced two new variants of their Fully Custom Projects (FCP), the S531 and S532. Both luxury yachts are 53 metre yachts that provide a customisable platform, presenting an interior volume similar to that of larger yachts.

The S531 yacht (pictured above) is designed to offer living spaces that can be changed and restyled through a series of dividing glass doors that increase interior or exterior areas as needed by guests. Francesco Paszkowski is the man behind the design of the project, and styled the S531 with a striking exterior and functional layout inside. The design, based on Tankoa's 10.30 metre wide platform, will offer accommodation for 12 guests. The widest part of the yacht on main deck forward is devoted to the VIP and master suites. These two staterooms each have their own folding terraces, with the aft part of the lower deck houses the three remaining guest cabins.

Outside, large exterior spaces are available for guest relaxation and dining experiences. The flybridge offers a total of 160 square metres of living space, customisable to house any of the client's preferred amenities.

The S532 yacht (left) is based in the same platform as the S531, but will have increased space dedicated to interior living areas, leading to a gross tonnage of over 780GT. The same accommodation layout is available, but Paszkowski created larger aft entertainment areas in the main and upper saloons, with a panoramic saloon and dining room surrounded by full height windows.

Both luxury yachts will have large crew quarters forward on the lower deck, a tender bay aft of the engine room that will be converted into a beach club when at anchor.

It is expected that both motor yachts models will have a calculated range of 4,000 nm with a top speed of 18 knots and a cruising speed of 15 knots.
